

My gracious Thanks and heartiest congratulations to the courageous Commissioners and all the members of the panel here tonight. It signifies the dawn of a new era in The 3rd Double Non violent Movement of the Millennium - A We the People Democracy based on the voices of nation themselves. This is the dawn of a new wave of not being spoken for but of the rise of the Silent Majority.

The large corporations have sold for personal profit the integrity of American people. This is the central issue the Commission must safeguard. Herein lies the integrity of the nation which has been superceded to earn the disrespect of the world's oppressed majority. The lopsided media coverages and disfranchised communities is the recipe for the demise of democracy.

The loss of small scale efficient production of news and the elimination of the unique cultural essence of the diverse human families who are the fabric of civilization will be offset by the courageous efforts and re-education of the Corporate buy-out about to take place in congress will be rewarded by generations to come. The momentum will grow as the quest for a Government of the people based on truth and right actions gathers speed to stop the disenfranchisement of a people. Thanks for Awakening us Georgians from our slumber. LONG LIVE THE REBELS IN DEFENCE OF THE CONSTITUTION.
